

Children's Health Ireland  
at Crumlin

## Fundraising Day on Sat 25th July 2020

*Last year, over 300,000 children attended CHI Temple Street and CHI Crumlin in need of specialist and complex care.*

*In 2020, demand for these services will not diminish, they will only increase as a result of the COVID-19 pandemic.*

*Right now, front-line teams are working harder than ever before to continue doing whatever it takes for sick children and their families during these challenging times. In recognition of this, Children's Health Foundation are working hard to provide the vital funds that CHI Crumlin staff, patients and families need both now and in the future. Whether that is by providing the patient and parent supports that make each day easier or the vital life-saving equipment that these children will need long after COVID-19 has eased, CHF are focused on offering these children and their families the integrated healthcare services that will help them fight childhood illness.*

**Your support on the day will be greatly appreciated and will raise vital funds for Children's Health Ireland.**
